

ARE THE STEM CELLS READY FOR TRANSPORT?

Ensuring the highest levels of accuracy, safety, and efficiency for the benefit of donors, patients, and supporting facilities.

Ready, set, label and...

Have source documents in hand when labeling:

- NMDP Verification
- Declaration of Eligibility
- STAR Link Tracking Sheet
- Procedure record and/or end of collection label
- Laboratory worksheet and/or end of collection label

...tag the product

Declaration of Eligibility is the source of truth when it comes to determining if you need a biohazard tag and which tag to use.

- **Tag 1:** DMs or HHSQ incomplete/ not performed
- **Tag 2:** Positive IDMs indicate possible RCDAD risk
- **Tag 3:** Donor health records indicate possible RCDAD risk

Last name, first name

- Flipping recipient's first and last name is a common error.
- It is listed on Tracking Sheet as (FIRST LAST) and should be listed on label as (LAST, FIRST).

When in doubt, read it out

- GRID is 19 digits, RID is 7 digits. It's easy to get one digit wrong! Take it slowly and check multiple times.
- Read numerical identifiers like GRID and RID out loud to a verifier, and then have the verifier read them back.

Here comes the courier

Affix

- ISBT 128 Label adhered to bag

Attach

- Additional Product Information tie tag – *both sides*
- Biohazard Tag (if applicable)

Accompany

- Circular of Information
- Declaration of Eligibility
- Donor IDMs
- Record of Packaging and Receipt
